

Antonio Angora

Senior Backend Developer

Results-driven IT analyst and backend developer with over six years of extensive experience in software development and system integration. Proven expertise in crafting robust backend solutions and optimizing database performance, while effectively collaborating with cross-functional teams. Proficient in PHP, MySQL, and Git, leveraging these technologies to enhance operational efficiency and drive project success. Committed to continuous learning and professional development, aspiring to advance as a Senior Backend Developer.

Employment History

IT Analyst and Backend Developer at Docplanner

OCTOBER 2021

In the role of IT Analyst and Backend Developer at Docplanner, responsibilities include developing and maintaining backend services that enhance the functionality of the company's platform. Constant collaboration with cross-functional teams ensures that all technical requirements are met and that system performance is optimized.

- Designed and implemented robust backend solutions using PHP and MySQL.
- Enhanced application performance through effective debugging and optimization techniques.
- Collaborated with front-end developers to integrate user-facing elements with server-side logic.
- Participated in the design and execution of system architecture improvements.
- Provided ongoing support and training for team members on backend technologies.

Computer Analyst and Integration Engineer at TuoTempo

OCTOBER 2018 – OCTOBER 2021

As a Computer Analyst and Integration Engineer at TuoTempo, the focus was on analyzing system requirements and integrating various software solutions to improve overall efficiency. This position required a keen understanding of both hardware and software systems, ensuring seamless integration across platforms.

- Conducted thorough analysis of system needs and proposed effective integration solutions.
- Worked with diverse teams to implement new software systems and ensure compatibility.
